A BETTER WAY TO MANAGE
YOUR PROPERTY

CLASSCRUISER BOOKING MANAGMENT

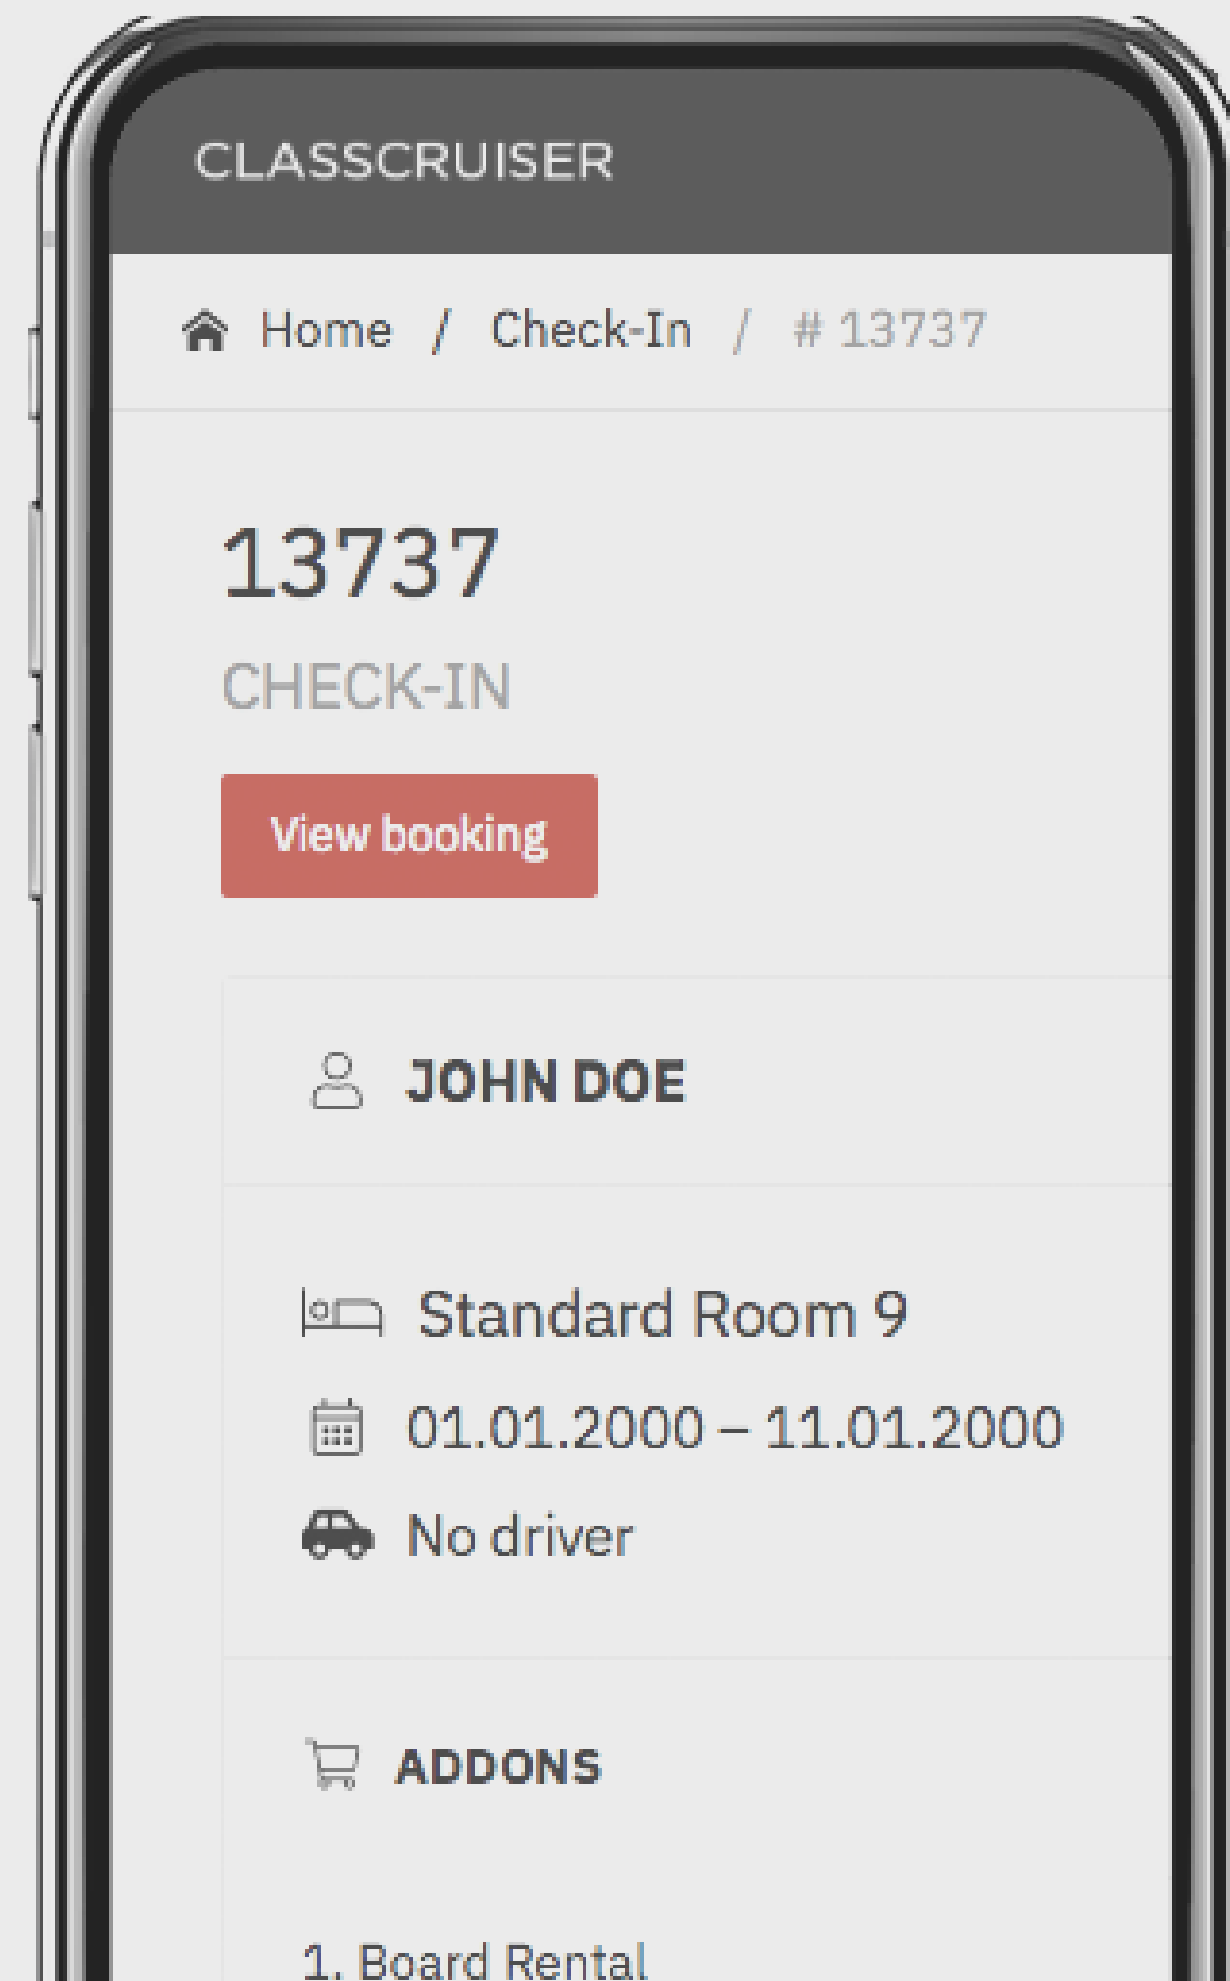

CLASSCRUISER

Have you ever dreamed of a time when managing your bookings not only becomes easier but also brings you more income and at the same time saves you money? Sounds too good to be true right? Not anymore. Welcome to ClassCruiser – The property management system that works for everyone

Our basic features will work for almost any type of business, not just accommodation. Better still if there is a feature that you would like to add to ClassCruiser, we can make that happen for you! Sound easy? That's because it is..

ClassCruiser LTD was born in the year 2018 from frustrations that grew from using other bookings systems that just could not keep up with our demand and accelerated growth. Every time we asked for a particular feature we were told “Yes, this is a possibility, we have this on our future to do list and we aim to have this feature in 12 to 18 months” Sound familiar?

With ClassCruiser, you explain to us what features you would like, we come up with a plan and pitch that to you on our next meeting, and we’ll continue to work on the project until we get it right, when you, our client says “Yes, we like it” then we will implement these changes for you and all of this before you sign any contracts.

You look after the guest and we'll do the rest!

OVERVIEW

- Managing your business has never been this easy using ClassCruiser
- Controlling every aspects of your business in one easy to manage platform
